PROFILE SUMMARY

B.Tech Computer Science and Engineering graduate with hands-on experience in AI-powered financial document processing, OCR/VLM-based extraction, document classification, software testing, and debugging. Skilled in Java, Python, C++, JavaScript, React.js, FastAPI, MySQL, Git, and ServiceNow. Experienced in validating AI outputs, investigating extraction issues, performing regression testing, and verifying fixes.

EDUCATION

Siksha 'O' Anusandhan University, Bhubaneswar **2026**
B.Tech – Computer Science and Engineering *CGPA: 7.6*

Deepika English Medium School **2022**
Higher Secondary Certificate

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript
AI/ML & Document Processing: OCR, VLM, Document Classification, Data Extraction, Data Validation
Frameworks & Web: React.js, FastAPI, HTML, CSS
Testing: Unit Testing, Functional Testing, Regression Testing, Vitest
Libraries: PyTorch, Pandas
Databases: MySQL, MongoDB
Tools: Git, GitHub, VS Code, ServiceNow

EXPERIENCE

KreativeTimebox
AI/ML Intern *AI-Powered Financial Document Processing*

- Worked on AI-powered processing of invoices, receipts, and bank statements.
- Performed functional, unit, and regression testing for document extraction and classification modules.
- Validated OCR/VLM-based extraction of supplier/customer details, line items, VAT, totals, payment information, and bank details.
- Investigated extraction and classification issues using backend responses, logs, and UI behavior, and verified fixes across document formats.
- Reported defects, tracked fixes, and collaborated with developers to reproduce and validate issues.

SERVICENOW TRAINING

ServiceNow **Jun 2025 – Aug 2025**
ServiceNow Platform Training

- Gained hands-on experience with Incident Management, Change Management, Service Catalog, ServiceNow Studio, and Flow Designer.
- Worked with Glide Script, Client Scripts, and Business Rules and learned ITSM and CMDB concepts.
- Built and customized applications, forms, fields, workflows, and service requests on the ServiceNow platform.

PROJECTS

Book Management System – ServiceNow

- Developed a ServiceNow application to manage book records, issue/return workflows, and user requests.
- Created tables, forms, fields, Business Rules, Client Scripts, and Service Catalog items with approval workflows.

File Explorer Application – C++ GitHub

- Developed a file explorer for managing files and directories using file handling and system-level operations.
- Implemented create, delete, rename, copy, and move operations using OOP concepts for modular design.

CERTIFICATIONS & ACHIEVEMENTS

ServiceNow: Certified System Administrator (CSA), Certified Application Developer (CAD)
Oracle: Agentic AI Certified Foundations Associate
Infosys Springboard: Introduction to Data Science
Deloitte: Data Analytics Job Simulation
HackerRank: Frontend Developer (React)
